Brief Description of the Issue

I against installing cell towers in the downtown area of Nevada city. The long-term health effects of these towers, while being researched in the past few years with unfavorable results, has not been determined long term and the city is putting the health of its citizens at risk. Furthermore, it is against the zoning laws of our town to allow outside commercialized/ franchised companies to do business within our city limits. Finally, we have a strict code of historical building, improvements and additions to the downtown area. All local business owners have had to comply. It would seem there would be a conflict of interest in allowing large, modern cell towers within our downtown historical district.

Verizon is conducting a fake poll , because the only answer is yes, if you answer no it won't send it. They are texting their customers asking if they would like better cellphone service in Nevada City please see below. This is consistent with the one sided lobbying that the people of Nevada City are not going to stand for, that Verizon has become famous for. <https://sierrafoothillsreport.com/2016/08/25/verizon-texts-its-customers-to-support-downtown-nc-cell-antennas/>

Brief Description of the Issue
I was not given an option to say no on Verizon, whatever it was. I would never agree to towers in our historic downtown Nevada City which produces unsafe levels of radiation. If you do not agree I suggest you do the research. Cell phones themselves have proven to cause brain cancer, why would cell phone towers do otherwise? My Verizon cell phone does just fine getting a signal just fine, thank you very much. So no I do not consent to towers downtown Nevada City. A ridiculous and unnecessary idea!

Brief Description of the Issue
To try to further support its now unapproved (by the N.C. Planning Commission) use permit application for 8 new rooftop cellular antennas on 109 N. Pine St. in Nevada City Verizon has sent a "survey" message to all of its Nevada Count customers asking if they want the 8 new antennas to give better service -- without allowing the option of replying "no." This seems a very unfair intervention in a local Planning Commission process.

Brief Description of the Issue
Unacceptable placement of cell phone towers with untested technology in my historic downtown Nevada city where I work and bring people from all over the world to enjoy the beauty, the freedom from corporate presence and the overall good feeling that we have. I do not agree with allowing Verizon to place towers there and think that the city should reject this at all levels. People have plenty of cell phone reception and do not need to add more.

Subject: No to Verizon

Greetings all,

I am emailing all of you to express my concern for Verizon's plan to install cell towers downtown.

I am **very much** opposed to their plans and do not want to see any additional cell towers downtown.

I have been a Verizon customer for 10 + years and have never had a coverage problem.

I believe it is a health risk, it is unsightly, and feel that this corporation is only concerned with profits and not the well being of the community.

I am finding it difficult to make it to the public meetings, hence this email.

Thank you for your consideration. Feel free to follow up with me.

Robert

Verizon is conducting a fake poll asking its customers if they'd like better coverage in Nevada City. They are suggesting to their customers that coverage is not adequate. Also if you answer NO they will not register the response. This is a deceptive poll

Verizon inappropriately sent uninvited texts to get citizens to Say YES to their contested towers on Friar Tucks. An offensive campaign... Using my phone and time to garner support, they also rejected texts that said NO. How UNcommunity minded and unfair is that?

My electromagnetic sickness/sensitivity makes using services Downtown already intolerable. More antennas will make it so I cannot access any antennas. I may consider this a violation rights and act accordingly. Many military I have talked to confirm this is Military Microwave Warfare technology. DO YOUR RESEARCH and SAY NO.
